Write Your Own 64-bit Operating System Kernel #1 - Boot code and multiboot header

CodePulse
46.5K subscribers

27K | Share | Ask | Save

909K views 5 years ago
In this series, we'll write our own 64-bit x86 operating system kernel from scratch, which will be multiboot2-compliant. In future episodes we might expand out to other architectures and bootloaders.

In this first episode, we write our initial boot code and also include a multiboot2 header so that it can be understood by bootloaders. ...more
